## QUALITY POLICY

At Delta Superalloys LLP, we are committed to delivering premium quality high nickel alloy materials that meet the highest industry standards and customer requirements.

Our quality management system ensures rigorous inspection, testing, and traceability at every stage of production, reinforcing our dedication to excellence, reliability, and continuous improvement.

To achieve this, we adhere to the following principles:

- **Inspection and Verification:**

All products undergo thorough dimensional, visual, and surface inspections to ensure conformity to specified requirements.

- **Non-Destructive Testing (NDT):**

We conduct ultrasonic testing (UT) to detect internal imperfections, ensuring product integrity and reliability.

- **Material Verification:**

Positive Material Identification (PMI) is performed to confirm the chemical composition and authenticity of materials, ensuring compliance with specifications.

- **Traceability and Marking:**

Each product is systematically marked and documented, enabling full traceability and transparency throughout the supply chain.

- **ISO-Certified Quality Management:**

We operate under an ISO-certified quality management system, reflecting our continuous pursuit of improvement, operational excellence, and customer satisfaction.

At Delta Superalloys LLP, quality is not just a policy – it is the foundation of our operations, driving our reputation as a trusted leader in the high nickel alloy industry.
